## 1 Getting Started

The ArcGIS for INSPIRE 10.8.1 Patch 1 includes the following setups:

- **Desktop Extension**—Enables the map and INSPIRE services authoring
- **Server Extension**—Extends ArcGIS for Server by adding server capabilities for INSPIRE view, feature download, and predefined dataset download services
- **Geodatabase templates** – Include all the geodatabase templates for use with ArcGIS for INSPIRE. Many of the geodatabase templates has been updated with ArcGIS for INSPIRE 10.8.1 Patch 1 as part of effort to improve compliance:

**Please Read the Release Notes before Upgrading to ArcGIS for INSPIRE 10.8.1 Patch 1.**

## 2 Installation Requirements and Guidelines

### 2.1 Installation Requirements

ArcGIS for INSPIRE 10.8.1 Patch 1 requires both ArcGIS Desktop and ArcGIS Server version 10.8.1 and ArcGIS for INSPIRE 10.8.1 prior to the upgrade.

ArcGIS for INSPIRE 10.8.1 Patch 1 also requires 10.8.1 Patch 1 geodatabase template.

Follow are the general steps:

1. Install ArcGIS 10.8.1 if not already installed
2. Install ArcGIS for INSPIRE 10.8.1 if not already installed
3. Install the Desktop Extension (see DesktopExt\InstallationGuide\_ArcGISForINSPIRE\_Desktop\_ext\_10\_8\_1\_EN.pdf in ArcGIS for INSPIRE 10.8.1 release).
4. Install the Server Extension (see ServerExt\InstallationGuide\_ArcGISForINSPIRE\_Server\_ext\_10\_8\_1\_EN.pdf in ArcGIS for INSPIRE 10.8.1 release).

It is also possible to upgrade from earlier versions to 10.8.1. Please refer to ArcGIS for INSPIRE 10.8.1 documentation on detailed installation and upgrade instructions.

### 2.2 Install the Desktop and Server Extensions Upgrades

Following are the steps:

1. Stop existing map services with enabled INSPIRE Extension (SOE) if any
2. Install ArcGIS for INSPIRE Desktop Extension 10.8.1 Patch 1
  - a. Double click on AG4IDesktopExt1081u1.msp
3. Install Server Extension 10.8.1 Patch 1
  - a. Double click on AG4IServerExt1081u1.msp
  - b. Run the ArcGIS for INSPIRE configuration utility

## 2.3 Update the Geodatabase Templates

ArcGIS for INSPIRE 10.8.1 Patch 1 requires 10.8.1 Patch 1 geodatabase template. The full 10.8.1 Patch 1 geodatabase template is available within the installation package. If you are setting up a new geodatabase, you can install the 10.8.1 Update 1 geodatabase template directly, if you are updating 10.8.1 to 10.8.1 Patch 1 geodatabase, please read the ArcGIS for INSPIRE 10.8.1 Patch 1 **INSPIRE Geodatabase Templates Installation Guide** (GDB Templates\InstallationGuide\_ArcGISForINSPIRE\_GDB\_10\_8\_1P1\_EN.pdf).

## 2.4 INSPIRE-Enabled Map Service Documents

It is recommended to create new MXDs using ArcGIS for INSPIRE 10.8.1 Patch 1 for use in the 10.8.1 Patch 1 environment.

## 2.5 Migrating INSPIRE View and Download Services

If you have existing INSPIRE View and Download Services created with ArcGIS for INSPIRE 10.8.1, you do not have to delete/recreate those services for 10.8.1 Patch 1, except the EF data theme. Re-start your existing services should be enough after ArcGIS for INSPIRE 10.8.1 Patch 1 has been installed and configured properly.

For EF data theme, generally, you can create new MXDs with 10.8.1 Patch 1 and either publish a new INSPIRE service or republish the services with the overwrite an existing service option.

## 2.6 Install Geoportal Server

Currently there is no additional Geoportal Server release with ArcGIS for INSPIRE 10.8.1 Patch 1, please visit <https://github.com/Esri/geoportal-server-catalog/releases> and <https://github.com/Esri/geoportal-server-harvester/releases> for geoportal related updates. The INSPIRE Geoportal Server for 10.8.1 is based on the open source Esri Geoportal Server 2.x and tailored toward INSPIRE needs. For new installations, use the following steps:

1. Go to Geoportal folder or download from Github at <https://github.com/Esri/geoportal-server-catalog/releases> for geoportal catalog, and <https://github.com/Esri/geoportal-server-harvester/releases> for harvester.
2. Set up the Geoportal Server Catalog by following the Geoportal Server installation guide available at <https://github.com/Esri/geoportal-server-catalog/wiki/Installation>.
3. Set up the Geoportal Server Harvester by following Harvester installation and configuration Instructions at <https://github.com/Esri/geoportal-server-harvester/wiki/Installation-guide>.

If you have an existing INSPIRE Geoportal Server 1.x instance, before upgrading, please read the upgrade instruction at <https://github.com/Esri/geoportal-server-catalog/wiki/Upgrade-from-Geoportal-Server-1.x-to-2.x>.

## 3 Software Authorization

After installing the software, you must authorize it for use. Log in to the Esri Customer Care portal (customers.esri.com) using your Esri Global Account to obtain the authorisation numbers. View the Installation Guide for more information.

## 4 Release Notes

The ArcGIS for INSPIRE 10.8.1 Patch 1 Release Notes document (Release-Notes\_ArcGISForINSPIRE\_10.8\_1P1\_EN.pdf) contains a list of features available with ArcGIS for INSPIRE 10.8.1 and current known issues within the product.

## 5 Getting Support

Your Esri regional office or international distributor provides support for ArcGIS 10.8.1 Patch 1; for the appropriate contact information, visit [support.esri.com/en/phoneSupport](http://support.esri.com/en/phoneSupport).

For the most current information for all ArcGIS products, visit ArcGIS Resources at [resources.arcgis.com](http://resources.arcgis.com).

Another useful source of information is the web help available at the following sites:

- English: <http://links.esri.com/en/arcgis-for-inspire>
- French: <http://links.esri.com/fr/arcgis-for-inspire>
- German: <http://links.esri.com/de/arcgis-for-inspire>
- Spanish: <http://links.esri.com/es/arcgis-for-inspire>

Installation guide documents, as well as acknowledgments to third parties whose software has been used in permissible forms with ArcGIS for INSPIRE, are available in the respective component folders (e.g., DesktopExt for ArcGIS for INSPIRE Desktop extension).
